

## YOUR WEALTH STRUCTURING PARTNER

### TRUST IS A COMPANY'S MOST VALUABLE ASSET

We are your competent partner for integrated international trust and financial services. As part of our wealth structuring services, we offer you comprehensive support for all financial matters concerning your family and business.

As specialists with a view to the whole, we strive for a suitable overall solution available for you in a wide range of areas. Our expertise is especially valuable for complex transnational matters. But implementation of even the highest standard of services requires the core element of trust – trust in the integrity and professionalism of the provider.

### SYSTEMATIC ADVISORY APPROACH

Customization, reliability and personal attention characterize our services, which we have offered as a licensed Liechtenstein trust company to business and private clients over many years.

A team of experienced and highly qualified specialists in company and trust law, inheritance, financial and tax matters, investment projects and financial consulting guarantee the necessary security.

### CUSTOMIZED SOLUTIONS

We carefully coordinate the individual steps to structure your assets and to secure and multiply them over generations. We limit risks in transnational scenarios by taking account of differences in mentality and culture but also economic, tax and legal differences.

We are able to rely on an international network of relationships in this regard with first-class asset managers as well as legal, tax and financial specialists.

### EFFECTIVE ASSET PROTECTION

Asset protection means the preventive protection of private assets from claims and unwanted access by associated persons and third parties in the broadest sense.

The specific solution depends on the individual circumstances of the client, the type and location of business activity, the place of stay/residence, the time horizon, the type of assets and the family constellation. The goal is to secure the economic existence of both individuals and families.
